PROFESSIONAL SUMMARY

I have climbed from IT Intern to leadership through initiative, adaptability, and commitment to continuous learning. I am experienced in enterprise IT operations, infrastructure, automation, and data-driven technical solutions. I have a passion for solving complex problems and learning new technologies. Currently pursuing my degree while continuing to expand expertise across infrastructure, software development, and data engineering.

EXPERIENCE

STERLING INFRASTRUCTURE, INC. — FEB 2022 - PRESENT

IT Intern | IT Specialist | IT Lead Technician | Technical Operations Lead

- Worked as central point between help desk, applications, infrastructure, and cyber security teams. Ensuring the smooth functioning of the organization's technical infrastructure, applications, and processes.
- Lead Troubleshooting and Incident response, above and beyond, conducting post-incident reviews to prevent future occurrences.
- Implementation of Microsoft Intune for the organization, including device onboarding, package creation, and development of deployment strategies.
- Lead and supported a team of 9 help desk technicians, providing daily guidance, training, and mentorship.
- Acted as the primary escalation point for complex technical issues, delivering timely solutions.
- Management of Ivanti's ITSM platform until we switched to InvGate's ITSM and ITAM platform at which point, I implemented the new service, including user and device provisioning, workflow creation, and automations.
- Deploying SQL procedures and Crystal Reports for the company's Viewpoint Vista ERP system in a DevOps capacity.
- Championed and implemented BookStack an open-source knowledge base system, to better track and maintain company knowledge, also worked to write hundreds of KBs.
